

Amino Softgels

Ultimate Nutrition introduces Amino Softgel; a fast-acting, easily-digested softgel that provides a full spectrum of essential and non-essential amino acids. Each serving contains 3 grams of high-quality protein, derived from wheat and bovine gelatin. Amino acids are the building blocks of protein in the body; as such they are essential for the synthesis of structural proteins, enzymes, and some hormones and neurotransmitters. Amino acids are also involved in numerous metabolic pathways that affect exercise metabolism.

Available in 300 softgel bottles.
